

Autism Self Identification Study

Do you think you might be autistic but don't have a diagnosis?

- ✓ Aged 18 or over
- ✓ Self-identify as autistic or are questioning if you're autistic
- ✓ Living in the UK

Take our anonymous online survey
15-20 minutes

Topics include:

- ✓ Information sources
- ✓ Reasons for seeking a diagnosis
- ✓ Views about diagnosis

Scan the QR code or use the link to read more about the study and decide whether you would like to take part.

The questionnaire asks about personal experiences of autism self-identification, information sources, social media and views about autism diagnosis. Some people may find these topics personal or upsetting. Taking part is voluntary. You may skip any question or stop the questionnaire at any time without giving a reason.

Optional choices after the survey

Prize draw: You can enter a prize draw with one £30 voucher and two £10 vouchers.

Optional interview: You can also express interest in an optional Microsoft Teams interview lasting up to one hour.

After the survey, a separate form will allow you to enter the prize draw, express interest in an interview, or choose both options. Your contact details will be kept separate from your questionnaire answers.

There is one prize-draw entry per person. Taking part in an interview will not provide another entry. Your prize-draw entry will not be affected by whether you express interest in, are invited to, accept or complete an interview.
