

# Help us improve care for Autistic adults with life-limiting conditions, their carers, and Autistic adults who care for others

Are you:

- an autistic adult living with a life-limiting condition, or
- a current or former carer of an autistic adult with a life-limiting condition, or
- an autistic adult who is a carer (or former carer) of someone living with a life-limiting condition?

Would you like to help shape a new UK research study aiming to improve healthcare for autistic adults and the people who support them?

We know how challenging it can be to navigate healthcare when living with a life-limiting condition. We want to understand what helps, what gets in the way, and what needs to change.
